A. Course Handout

Institute/School Name	Chitkara University Institute of Engineering & Technology		
Department Name	Department of Computer Science and Engineering		
Programme Name	B.E (Computer Science & Engineering)		
Course Name	Computer Networks	Session	Jan – June 2026
Course Code	24CSE0215	Semester/Batch	4th /2024
L-T-P(Per Week)	3-0-0	Course Credits	03
Pre-requisite	Basic knowledge of Computers.	NHEQF Level	05[1]
Course Coordinator	Dr. Chetna	SDG Number	4,8,9[4]

1. Objectives of the Course

The scope of the course is to provide a foundation for understanding the key aspects of computer network organisation and implementation, and to obtain a theoretical understanding of data communication and computer networks. Students will be introduced to the fundamentals of computer communication, network design, and network operations, providing a strong conceptual foundation aligned with industry-standard networking practices. The objectives of the course are:

- to build an understanding of the fundamental concepts of computer networking.
- to inculcate the skill in students to construct and debug computer networks.
- to develop, implement and manage computer networking systems within an organization.
- to familiarize with current topics such as network management, security and/or other topics.

2. Course Learning Outcomes

After completion of the course, the student should be able to:

	Course Learning Outcome	*POs	NHEQF Level Descriptor[1]	Sessions
CLO01	Define the hardware, software, and components of a network, as well as their interrelations.	PO1, PO2, PO3, PO5, PO12	Q1	8
CLO02	Explain the role of reference models and the hierarchical relationship of their respective layers	PO1, PO3, PO4, PO5	Q1, Q2	8
CLO03	Classify the networking protocols and select the appropriate protocol for a particular design.	PO1, PO2, PO3, PO4, PO5, PO7, PO11	Q2	10
CLO04	Examine the concepts and theories of networking with the real-world scenarios.	PO3, PO4, PO5	Q3, Q4	9
CLO05	Design an enterprise network including topologies, protocols, management and security.	PO4, PO5	Q3, Q5, Q6	10
Total Contact Hours				**45**

Revised Bloom's Taxonomy Terminology
* PO's available at (shorturl.at/cryzF)
**Cognitive Level =CL
***Knowledge Categories = KC

CLO-PO Mapping

Course Learning Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	Type of Assessment's[3]
CLO01		H		H		M							Summative
CLO02	H	H	H	M	M	M					H		Summative
CLO03	H	M		H	M	M					M		Summative
CLO04	H	H		H		H							Summative
CLO05	H	H	H		M	M	M				M		Summative

H=High, M=Medium, L=Low

5. Recommended Tools and Platforms

Cisco Packet Tracer-7.3 or above versions

6. Course Plan:

Lecture Number	Topics	Textbook
1	**Detail Discussion of Course Handout (CHO)**	B01-Chpater-1
2-4	**Introduction:** Uses of Computer Networks, Network Hardware Topologies, Collision Domain, Broadcast Domain **Activity (1)** Introduction to Packet Tracer, Introduction of Cables, Network devices: Hub, Switches, Router.	B01-Chapter-1
5-6	**Reference Models:** Seven-Layer OSI architecture, Concepts of Layers, Protocols and Layer interfaces and PDU, TCP/IP Reference Model, Comparison of OSI and TCP/IP reference models	B01-Chapter-2
7-9	**Physical Layer:** Transmission Media (Cable Media), Wireless Media (Cellular Telephone, Satellite Networks) Types of Connecting Devices (Hubs, Switches, Routers) **Activity (2)**	B01-Chapter-7

	To do peer to peer connectivity, assign the IP address and share the resources	
10-11	**Ethernet Frames,** Ethernet and the OSI Model, Ethernet Frame Fields, Ethernet MAC Address, Frame Processing, Multicast MAC Address, Broadcast MAC Address, Unicast MAC Address	B01-Chapter-13 B01-Chapter-13
12-13	**Data Link Layer**: Types of Errors, Redundancy, Error Detection and Correction, CRC, Check Sum, Hamming code & Distance **Activity (3)** Simulation of Network Devices (HUB, Switches, Router) and connect more than two computers using Switch –Star Topology	B01-Chapter-10
14-15	**Multiple Access Protocols**: - Random Access Protocols–ALOHA, CSMA, CSMA/CA, CSMA/CD	B01-Chapter-11 B01-Chapter-12
16-17	**Channelization Protocols:** FDMA, TDMA, CDMA, **Controlled Access Protocols:** Reservation, Polling, Token Passing, Piggybacking	B01-Chapter-11
18-19	**Noisy Channel:** Stop and Wait, Automatic Repeat Request, go-back-n, selective repeat	B01-Chapter-12
ST-1 Syllabus (Lecture number 1-19)		
20-21	**Noiseless Channels:** Elementary data link protocols, Simplex, Stop and Wait Protocol	B01-Chapter-11 B01-Chapter-23
22-25	**Network Layer:** Concept of IP packet and addresses, IPv4 protocol format, Routing Algorithm-Distance Vector Routing, Link State Routing	B01-Chapter-19
26-30	Network Classes (A, B, C, D) and Subnetting, Troubleshooting **Activity (4)** Subnetting of Class A, B and C using different IP addresses, using FLSM and using VLSM	B01-Chapter-21
31-32	ICMP, IGMP, ARP, RARP, IPV6, Transition from IPv4 to IPv6(format) **Activity (5)** Basic commands of Routers: hostname, password, Show Run, Show IP int brief, Assigning IP addresses to interfaces, To Perform Static Routing, Default Routing using 2 and 3 routers	B01-Chapter-20
33-35	**Static and Dynamic routing algorithms**: Shortest Path Routing, Routing Protocols (Static and Dynamic) **Activity (6)** To perform dynamic routing using RIP (Routing Information Protocol) to enable automatic route discovery and exchange of routing information among networked routers, ensuring efficient packet forwarding and adaptability to network topology changes	B01-Chapter-22
36-38	**Routing Protocols:** OSPF, EIGRP, Introduction to BGP, Routing Information Protocol (v1 & v2) **Activity (7)** To perform dynamic routing using OSPF (Open Shortest Path First) to enable routers to automatically discover network topology, calculate the shortest path using link-state information, and efficiently forward packets with fast convergence.	B01-Chapter-22
39-40	**Transport layer:** Services, Connection Less and Connection Oriented protocol, Transport Layer Protocols, TCP Connection, Transmission Control Protocol with Three-Way Handshaking	B01-Chapter-23
41-42	TCP / UDP Message Format, Congestion Control and Quality of Service	B01-Chapter-23
ST-2 Syllabus (Lecture number 1-42)		
43	**Application Layer:** Domain Name System, Remote Logging, Electronic Mail, Introduction to FTP and WWW, Introduction to HTTP and SMTP	B01-Chapter-25
44-45	**Network Security:** Introduction to Cryptography, Public and Private Key, Digital Signature, Internet Protocol Security (IPSec), Firewalls and Types of Firewalls, Pretty Good Protocol (PGP)	B01-Chapter-30,31
ETE (Syllabus = Lecture number 1-45)		

7. **Delivery/Instructional Resources**

Lecture Number	Topics	CLO	Book No, CH No, Page No	TLM[1]	ALM[2]	Web References	Audio-Video
1	**Detailed Discussion of Course Handout (CHO)**	CLO01	B01-Chapter-1	Lecture Discussion			
2-4	**Introduction:** Uses of Computer Networks, Network Hardware Topologies, Collision Domain, Broadcast Domain	CLO01	B01-Chapter-1	Lecture Discussion	Quiz, Challenge, Assignment	https://www.cisco.com/c/en/us/solutions/automation/network-topology.html	https://www.youtube.com/watch?v=uDulBxDb7GM
5-6	**Reference Models:** Seven-Layer OSI architecture, Concepts of Layers, Protocols and Layer interfaces and PDU, TCP/IP Reference Model, Comparison of OSI and TCP/IP reference models	CLO02	B01-Chpater-2	Lecture Discussion	Quiz, Challenge, Assignment	http://www.ics.uci.edu/%7Emagda/Courses/netsys270/ch2_v1.ppt https://slideplayer.com/slide/254123/ https://www.slideshare.net/ankurkumar983/tcp-ip-model	https://www.youtube.com/watch?v=vv4y_uOneC0 https://www.youtube.com/watch?v=2QGgEk20RXM

8. Remedial Classes[4]

Slow Learners	Average Learners	Fast Learners
• Remedial Classes on Saturdays • Encouragement for improvement using Peer Tutoring • Use of Audio and Visual Materials • Use of Real-Life Examples	• Workshops • Formative Exercises used to highlight concepts and notions • E-notes and E-exercises to read ahead of the pedagogic material.	• Engaging students to hold hands of slow learners by creating a Peer Tutoring Group • Design solutions for complex problems • Design solutions for complex problems • Presentation on topics beyond those covered in CHO

9. Self-Learning[2]

Assignments to promote self-learning, a survey of contents from multiple sources.

11. Evaluation Scheme & Components:

Assessment Type[4]	Evaluation Component[5]	Type of Component[6]	No. of Assessments[7]	% Weightage of Component	Max. Marks	Mode of Assessment	CLO
Formative	Component 1	Formative Assessments	02*	20%	20	--	1-3
Summative	Component 2	Sessional Tests(STs)	02*	40%	40	Computer based online in Campus	1 – 2 1 – 4
Summative	Component 3	End Term Examination	01**	40%	40	Computer based online in Campus	1 - 5
Total				100%	100		

* No makeup exam will be conducted for any of the Formative Assessments (FAs) and Sessional Tests (STs).
* For both FAs and STs, the best score out of the two will be considered for the final marks computation.
**As per Academic Guidelines, a minimum of 75% attendance is required to become eligible for appearing in the End Semester Examination.

12. Syllabus of the Course:

Subject: Computer Networks / 24CSE0215			
S. No.	**Topic (s)**	**No. of Sessions**	**Weightage %**
1	**Introduction**: Uses of Computer Networks, Network Hardware Topologies, Collision Domain, Broadcast Domain, **Reference Models**: Seven-Layer OSI architecture, Concepts of Layers, Protocols and Layer interfaces and PDU, TCP/IP Reference Model, Comparison of OSI and TCP/IP reference models, **Physical Layer**: Transmission Media (Cable Media), Wireless Media (Cellular Telephone, Satellite Networks) Types of Connecting Devices (Hubs, Switches, Routers), **Ethernet Frames**, Ethernet and the OSI Model, Ethernet Frame Fields, Ethernet MAC Address, Frame Processing, Multicast MAC Address, Broadcast MAC Address , **Data Link Layer**: Types of Errors, Redundancy, Error Detection and Correction, CRC, Check Sum, Hamming code & Distance **Multiple Access Protocols**: - Random Access Protocols-ALOHA, CSMA, CSMA/CA, CSMA/CD **Channelization Protocols**: FDMA, TDMA, CDMA, Controlled Access Protocols: Reservation, Polling, Token Passing, Piggybacking, **Noisy Channel**: Stop and Wait, Automatic Repeat Request, go-back-n, selective repeat	**19**	**42%**
ST-1 (Covering 42% syllabus)			
2	**Noiseless Channels**: Elementary data link protocols, Simplex, Stop and Wait Protocol, **Network Layer**: Concept of IP packet and addresses,IPv4 protocol format, Routing Algorithm-Distance Vector Routing, Link State Routing Network Classes (A, B, C, D) and Subnetting, Troubleshooting, ICMP, IGMP, ARP, RARP, IPV6, Transition from IPv4 to IPv6(format), **Static and Dynamic routing algorithms:** Shortest Path Routing, Routing Protocols (Static and Dynamic), **Routing Protocols:** OSPF, EIGRP, Introduction to BGP, Routing Information Protocol (v1 & v2), **Transport layer:** Services, Connection Less and Connection Oriented protocol, Transport Layer Protocols, TCP Connection, Transmission Control Protocol with Three-Way Handshaking, TCP / UDP Message Format, Congestion Control and Quality of Service	**23**	**93%**
ST-2 (Covering 93% syllabus)			

[4] Refer to Annexure 2 of NCrF
[5] Refer to Annexure
[6] Refer to Annexure
[7] Refer to Annexure

3	**Application Layer:** Domain Name System, Remote Logging, Electronic Mail, Introduction to FTP and WWW, Introduction to HTTP and SMTP, **Network Security:** Introduction to Cryptography, Public and Private Key, Digital Signature, Internet Protocol Security (IPSec), Firewalls and Types of Firewalls, Pretty Good Protocol (PGP)	**3**	**100%**
End Term 100% syllabus			

13. Academic Integrity Policy:

Education at Chitkara University builds on the principle that excellence requires freedom where Honesty and integrity are its prerequisites. Academic honesty in the advancement of knowledge requires that all students and Faculty respect the integrity of one another's work and recognize the importance of acknowledging and safeguarding intellectual property. Any breach of the same will be tantamount to severe academic penalties.
